

Data collection

China Information System for Diseases Control and Prevention

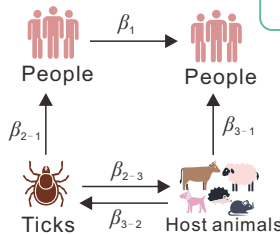

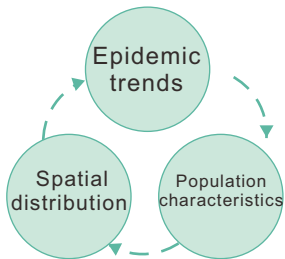

Statistical yearbook of Anhui province

Literature retrieval

A total of 3,883 SFTS cases were reported from 2019 to 2023

Transmission dynamics model parameters of SFTS

Epidemiological analysis

Transmissibility estimation

Multi-population and multi-route dynamic model

Model fitting

Goodness-of-fit test

Next-Generation Matrix

Calculation of the basic reproduction number (R_0)

Epidemic trends

Seasonal patterns

High-risk populations

High-risk area

Quantifying the transmissibility of SFTS by calculating the basic reproduction number
